**FREE
SEMINAR**

Concussion Technology from Baselines to Recovery Tuesday, Dec. 6 • 6-8 p.m. 2nd Floor Assembly Rooms

All parents, teachers, coaches and physical trainers are welcome!

Join us to learn more about concussion baseline testing from XLNTbrain, which monitors an athlete's symptoms, guiding the athlete through a 5-step progressive exertion recovery plan and timeline. Fairfield Medical Center is working together with Fairfield County Safe Kids to bring this exciting technology to local schools in an effort to better diagnose concussions in young athletes.

FREE GIFT FOR ALL ATTENDEES

**RSVP 740-687-8007 opt. 3
Use Registration Code XLNT11**

This work is funded either in whole or in part by a grant awarded by the Ohio Department of Health, Bureau of Healthy Ohio, Violence and Injury Prevention Program and as a sub-award of a grant issued by the Ohio Department of Health under the Preventive Health and Health Services Block Grant, grant award number 3B01DP009042-1351, and CFDA number 93.991.

**Meet the Brain Doctor –
Harry Kerasidis, M.D.**

Over his medical career, Dr. Kerasidis has treated thousands of patients with concussions. Through his practice, he created new baseline measures, assessments, reporting tools and a 5-step recovery care plan, which provides the foundation of the XLNTbrain offerings now available anywhere, anytime through technological advances.

"In developing XLNTbrain, we took a step back and looked at concussion management from a clinical perspective and asked, 'What would be the best case scenario for sports teams?' We decided sports teams and athletes would benefit from having a virtual neurologist guiding them from end-to-end, so that's what we did with our online platform and mobile app. It's my 25 plus years of concussion experience packaged into one program that can be applied for an affordable annual subscription fee."
